INDEX

ABRASIVE method for microdissection of mineralized tissues, 253.
Abdominally-produced developmental hormone in Ostrinia, 185.
Acceleration of diapause development in Ostrinia by ammonium ion, 175.
Accumulation of nitrogenous compounds in terrestrial and aquatic snail eggs, 302.
Acetate, utilization of by sea urchin embryos for lipid synthesis, 440.
Activation, role of in uptake of glucose and amino acids by marine eggs, 456.
Active transport of D-glucose by catfish intestine in vitro, 291.
Activity rhythms in bats, 14.
Adaptation of Tetrahymena to high NaCl environment, 373.
Adaptive aspects of activity rhythms in bats, 14.
Aequipecten, shell formation in, 414.
Aequorea medusae, reversible inhibition of swimming in Stomotoca by extracts of, 115.
Air-abrasive method for microdissection of mineralized tissues, 253.
ALEXANDER, N. See S. D. BECK, 175, 185.
Allatectomy of parasitized cockroaches, 235.
Alpha-amylase activity in Crassostrea embryos, 199.
Amylase development in Crassostrea embryos, 199.
Anatomy of Homalometron, 163.
Ambystoma ear rudiment, development of in explants, 89.
Amino acids, uptake of by Asterias and Spisula eggs, 456.
Amino acids, uptake of by starfish organs in vitro, 391.
Ammonia production of snail eggs, 302.
Ammonium ion, effect of on diapause development in Ostrinia, 175.
Amphibia, erythrocyte size in, 83.
Amphibian ear rudiment, development of in explants, 89.
Amphibian embryo, regulation of liver tryptophan pyrrolase activity during, 307.
Anatomy of Renicola, 467.
Annelids, uptake of glycine by, 150.
Anomuran land crabs, water balance of, on dry atoll, 54.
Antennary glands, osmoregulatory role of, in estuarine crabs, 354.
Antisera against fertilizin, effect of on uptake of orthophosphate by sea urchin eggs, 1.
Aquatic invertebrates, uptake of organic materials by, 150.
Aquatic snails, accumulation of nitrogenous compounds in, 302.
Arbacia eggs, effect of antisera against fertilizin on orthophosphate uptake of, 1,
Arsenite, inhibition of respiration in marine dinoflagellate by, 274.
Artemia, genetics of, 333.
Aspects of activity rhythms in bats, 14.
Asterias, nutrient transport in, 33, 391.
Asterias eggs, uptake of glucose and amino acids by, 456.
Asterias gametes, method for obtaining, 8.
Asterias setting, variation in time and intensity of, 423.
Atoll, water balance of anomuran land crabs on, 54.
Auditory rudiment of amphibians, development of in explants, 89.
Autoradiographic studies of metamorphosing silkworms, 205.
Axial gradients of regeneration in planarians, 345.
Azide, inhibition of respiration in marine dinoflagellate by, 274.

BACKGROUND, role of in color change in Ocypode, 407.
Bats, rhythms of activity in, 14.
BECK, S. D., AND N. ALEXANDER. Chemically and photoperiodically induced diapause development in the European corn borer, Ostrinia, 175.
BECK, S. D., AND N. ALEXANDER. Proctodone, an insect developmental hormone, 185.
Behavior of Drosophila, in relation to light, 264.
Beta-glucosidase from Blaberus, 220.
Birgus, water balance of, on dry atoll, 54.
Blaberus, beta-glucosidase from, 220.

Osmotic relations of Tetrahymena, 373.
Ostrea, shell formation in, 414.
Ostrinia, chemically and photoperiodically induced diapause in, 175.
Ostrinia, developmental hormone in, 185.
Ova of Asterias and Spisula, uptake of glucose and amino acids by, 456.
Ova of sea urchin, synthesis of lipid by, 440.
Oxygen consumption of marine dinoflagellate, 274.
Oxygen consumption of metamorphosing silkworms, 205.
Oyster embryos, alpha-amylase development in, 199.

pH, effect of on Blaberus enzyme activity, 220.
Paracentrotus embryos, synthesis of lipid by, 440.
Parasitic relationship between Hydramoeba and Chlorohydra, 319.
Parasitized insects, source of juvenile hormone in, 235.
Park, H. D., C. E. Mecca and A. B. Ortmeyer. Carbon dioxide tension and sexual differentiation in Hydra, 121.
Parthenogenesis, role of in uptake of glucose and amino acids by marine eggs, 456.
Pathogenic rhizopod, effect of on reproduction of Chlorohydra, 319.
Pax, R. A., and R. C. Sanborn. Cardioregulation in Limulus. I., 133.
Pengelley, E. T. See R. E. Black, 199.
Periodism, possible role of proctodone in, 185.
Permeability relations in Nereis, 142.
Phlorizin, effect of on in vitro D-glucose transport by catfish intestine, 291.
Phosphate transport in sea urchin eggs, 69.
Phosphate uptake of sea urchin eggs, as related to action of antisera against fertilizin, 1.
Photoperiod and ammonium-ion-treated Ostrinia, action of proctodone in, 185.
Photoperiodically induced diapause development in Ostrinia, 175.
Phototaxis, genetic influence on, in Drosophila, 264.
Physiology of cardioregulatory process in Limulus, 133.
Physiology of diapause in Ostrinia, 175.
Physiology of insect diapause. XIII., 205.
Pigment changes in Ocypode, 407.
Polychaetes, deuterium oxide uptake by, 142.
Polymorphism, possible role of proctodone in, 185.
Pomacea eggs, accumulation of nitrogenous compounds in, 302.
Population differences in phototaxis of Drosophila, 264.
Population genetics of Artemia, 333.
Potassium regulation in Tetrahymena, 373.
Proctodone, an insect hormone, 185.
Properties of beta-glucosidase from Blaberus, 220.
Properties of starfish coelomic fluid, 33.
Prosobranch snail eggs, accumulation of nitrogenous compounds in, 302.
Protein, movement of in nutrition of starfish, 391.
Protein content of embryonic oysters, 199.
Proteins, synthesis of by Asterias and Spisula eggs, 456.
Proteins of extrapallial fluid in molluscs, 414.
Protozoan, adaptation of to high NaCl environment, 373.
Pyrrolase activity, liver tryptophan, during development of Rana, 307.

RADIOACTIVE glucose and amino acids, uptake of by Asterias and Spisula eggs, 456.
Radiocarbon, use of in labeling acetate and glycerol in studies of sea urchin embryo lipid synthesis, 440.
Radiocarbon, use of in studies of planarian regeneration, 345.
Radiocarbon, use of in study of starfish nutrient transport, 33, 391.
Radiocarbon, use of in study of uptake of glucose and amino acids by Asterias and Spisula eggs, 456.
Radiocarbon-labeled glycine, uptake of by Nereis, 150.
Radio-iodine, metabolism of by rainbow trout, 282.
Radiophosphorus, use of in study of phosphate transport in sea urchin eggs, 69.
Radiophosphorus, use of in studying phosphate of sea urchin eggs treated with antisera against fertilizin, 1.
Radiosodium, use of in osmotic studies with Tetrahymena, 373.
Rainbow trout, metabolism of I-131 by, 282.
Rana, regulation of liver tryptophan pyrrolase activity during development of, 307.
Rana ear rudiment, development of in explants, 89.
Rectal caeca of starfish, nutrient transport in, 391.
Redia of Homalometron, 163.
Regeneration in planarians, effect of nutrient media on, 345.
Regulation of liver tryptophan pyrrolase activity in development of Rana, 307.
Renicola, studies on, 467.
Reproduction of Chlorohydra, effect of Hydramoeba on, 319.
Reproductive isolation in Artemia, 333.
Reptiles, erythrocyte size in, 83.
Respiration of metamorphosing silkworms, 205.
Respiratory metabolism in marine dinoflagellates, 274.
Reversible inhibition of swimming in Stomotoca, 115.
Rhinolophus, activity rhythms in, 14.
Rhizopod, pathogenic, effect of on reproduction of Chlorohydra, 319.
Rhythmic production of proctodone in Ostrinia, 185.
Rhythms of activity in bats, 14.
Rivulus, homozygous clones in, 101.

SALAMANDER ear rudiment, development of in explants, 89.
Salinity, role of in osmoregulation of Hemigrapsus, 354.
Salinity in relation to glycine uptake of Nereis, 150.
Salinity relations of Tetrahymena, 373.
Salmo, metabolism of I-131 by, 282.
Salt-loss rates in Nereis, 142.
Samia, DNA synthesis during metamorphosis of, 205.
SANBORN, R. C. See F. M. FISHER, JR., 235; R. A. PAX, 133.
Scaphopod mollusc, burrowing behavior of, 28.
Sea urchin eggs, effect of antisera against fertilizin on orthophosphate uptake by, 1.
Sea urchin eggs, mechanism of phosphate transport in, 69.
Sea urchin embryos, synthesis of lipid by, 440.
Seasonal differences in osmoregulation of Hemigrapsus, 354.
Self-fertilizing teleost, homozygous clones in, 101.
Serosa of catfish intestine, transport of D-glucose by, 291.
Serum osmotic concentration of land crabs on dry atoll, 54.
Sex-limited gene in Artemia, 333.
Sexual differentiation in Hydra, in relation to carbon dioxide tension, 121.
"Shedding substance" from starfish, use of in obtaining gametes, 8.
Shell formation, studies on, 414.
Silkworm, DNA synthesis during metamorphosis of, 205.
Size, in relation to salt-loss rate, in Nereis, 142.
Size of erythrocytes in fishes, Amphibia and reptiles, 83.
SLOAN, W. C. The accumulation of nitrogenous compounds in terrestrial and aquatic eggs of prosobranch snails, 302.
SMITH, R. I. D_2O uptake rate in two brackish-water nereid polychaetes, 142.
Snail eggs, accumulation of nitrogenous compounds in, 302.
Sodium, adaptation of Tetrahymena to, at high concentration, 373.
Specificity of beta-glucosidase from Blaberus, 220.
Specificity, host, of Renicola, 467.
Sperm and eggs of starfish, method for obtaining, 8.
SPIEGEL, M., AND E. S. SPIEGEL. The regulation of liver tryptophan pyrrolase activity during the development of Rana, 307.
Spisula (Mactra) eggs, uptake of glucose and amino acids by, 456.
Sporocysts of Renicola, 467.
Starfish, nutrient transport in. I., 33; II, 391.
Starfish eggs, uptake of glucose and amino acids by, 456.
Starfish gametes, method for obtaining, 8.
Starfish setting, variations in time and intensity of, 423.
Starvation, role of in regeneration of planarians, 345.
STEPHENS, G. C. Uptake of organic material by aquatic invertebrates. III., 150.
STIVEN, A. E. The effect of the pathogenic rhizopod Hydramoeba on reproduction in Chlorohydra under various levels of temperature, 319.
Stomach of starfish, nutrient transport in, 391.
Stomotoca, inhibition of swimming in, 115.
STONE, D. See P. A. DEHNEL, 354.
Stress tolerance in Tetrahymena, 373.
Strongylocentrotus eggs, mechanism of phosphate transport in, 69.
Studies on genus Renicola, 467.
Studies on shell formation. X., 414.

STUNKARD, H. W. Studies on the trematode genus Renicola, 467.
Style of oysters, alpha-amylase in, 199.
Substrate, importance of in burrowing behavior of Dentalium, 28.
Substrate, role of in liver tryptophan pyrrolase activity of Rana embryos, 307.
Sulfhydryl enzyme in Blaberus gut, 220.
Swimming, inhibition of in Stomotoca, 115.
Synthesis of DNA during metamorphosis of Cecropia silkworm, 205.
Synthesis of lipid by sea urchin embryos, 456.
Systematics of genus Renicola, 467.
Systematics of genus Homalometron, 163.

TARICHA ear rudiment, development of in explants, 89.
Taxonomy of genus Renicola, 467.
Taxonomy of genus Homalometron, 163.
TEAL, J. M. See P. W. HOCHACHKA, 274.
Teeth, microdissection method for, 253.
Teleost, homozygous clones in, 101.
Teleosts, erythrocyte size in, 83.
Temperature, effect of on in vitro transport of D-glucose by catfish intestine, 291.
Temperature, role of in effect of Hydramoeba on reproduction of Chlorohydra, 319.
Temperature, role of in osmoregulation of Hemigrapsus, 354.

Temperature, role of in setting of starfish, 423.
Terrestrial snails, nitrogen compound accumulation in, 302.
Testes of silkworms, autoradiography of, during metamorphosis, 205.
Tetrahymena, adaptation of to high NaCl environment, 373.
Thiocyanate, effect of on I-131 uptake by rainbow trout, 282.
Thymidine, tritiated, use of in study of metamorphosis of silkworms, 205.
Thyroid radio-iodine, metabolism of by rainbow trout, 282.
Tissues, mineralized, microdissection method for, 253.
TOLIS, H. See A. MONROY, 456.
Transferase activity in Blaberus, 220.
Transplantation studies in Rivulus, 101.
Transport of D-glucose by catfish intestine in vitro, 291.
Transport of nutrients in starfish. I., 33; II., 391.
Transport of phosphate in sea urchin eggs, 69.
Trematode, morphology, life-history and systematics of, 163.
Trematode genus Renicola, studies on, 467.
Tribolium, source of juvenile hormone in, 235.
Tritiated thymidine, use of in study of metamorphosis of silkworms, 205.
Tryptophan pyrrolase activity in liver of Rana during development, 307.
Turnover of I-131 by rainbow trout, 282.

UPTAKE of deuterium oxide by brackish-water nereids, 142.
Uptake of I-131 by rainbow trout, 282.
Uptake of nutrients by isolated starfish organs, 391.
Uptake of organic material by aquatic invertebrates, 150.
Uptake of radioactive glucose and amino acids by Asterias and Spisula eggs, 456.
Uric acid production of snail eggs, 302.
Urinary excretion of I-131 by rainbow trout, 282.
Urine/blood ratios in Hemigrapsus, 354.
Urine osmotic concentrations in land crabs on dry atoll, 54.
Utilization of acetate and glycerol in lipid synthesis by sea urchin embryos, 440.

VALINE, uptake of by Spisula and Asterias eggs, 456.
Variations in time and intensity of starfish setting, 423.
Viviparus, shell formation in, 414.

WATER balance of anomuran land crabs on a dry atoll, 54.
Water relations of Hemigrapsus, 354.
